

**AMENDMENTS TO THE SPECIFICATION:**

Kindly insert the following heading between the title and line 4 on page 1:

Field of the Invention

Kindly insert the following heading at page 1, after line 8:

Background of the Invention

Kindly insert the following heading at page 2, after line 27:

Summary of the Invention

Kindly insert the following heading at page 8, after line 12:

Brief Description of the Drawings

Kindly insert the following heading at page 9, after line 5:

Description of the Preferred Embodiments

Kindly replace the paragraph beginning at page 14, line 4, with the following amended paragraph:

When, in this situation, it occurs that the sensor 7 establishes the risk of a condensate formation, the motor 39 is activated. It then turns the pinion 38 and the gear wheels 36, 37 engaging with the pinion 38 in such a manner that the distance between the tappet [[39]] 29 and the thermostatic element 30 is reduced. In this way, the desired value is adjusted to a higher temperature. This lowers the valve element 18 towards the valve seat 17, and the supply of cold heat transfer medium to the

heat exchanger is interrupted. However, the adjustment of the desired value must be so large that the room temperature does not exceed the new desired value, which consists of the old desired value plus the adjustment, while otherwise the valve 3 would open again anyway.

Kindly replace the heading at page 17, line 1, with the following amended heading: What is Claimed Is:
